TI 3F

05 - PLATFORM AS A SERVICE (PAAS)

Tujuan Pembelajaran

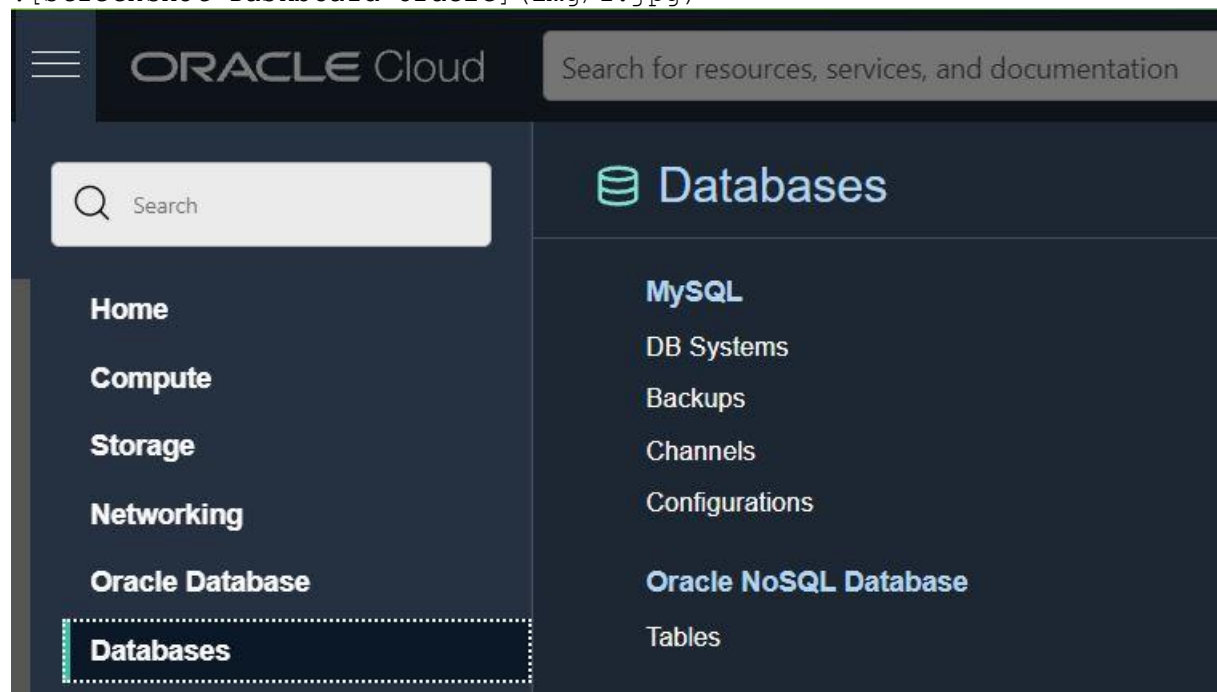

Mengetahui layanan yang ditawarkan cloud computing khususnya Oracle Cloud Infrastructure (OCI)

Hasil Praktikum

Praktikum 1: Praktikum PaaS

PaaS adalah pendekatan evolusioner untuk memberikan middleware dan kapasitas database

! [Screenshot Dashboard Oracle] (img/2.jpg)

Provide DB System information

Create in compartment
e941720140 (root)

Name
mysql20211005130634
The user-friendly name for the DB System. It does not have to be unique.

Description *Optional*

User-provided data about the DB System.

Standalone Single-instance MySQL DB System ✓	High Availability Run 3-instance MySQL DB System providing automatic failover and zero data loss	HeatWave DB System that allows you to enable HeatWave for accelerated query processing, suitable for running both OLTP and OLAP workloads
---	--	---

! [Screenshot Dashboard Oracle] (img/3.jpg)

Configure networking

[Collapse](#)

The VCN and Subnet where the MySQL DB System endpoint will be attached. The MySQL DB System endpoint uses only private IP addresses and is not directly accessible from the internet. Use bastion hosts or a VPN to access the MySQL database. Learn more about [Network Setup](#) for MySQL DB Systems and [how to connect to a MySQL DB System](#). If you do not already have one available then you will need to [create a VCN and Subnets](#).

Virtual Cloud Network in **e941720140** ([Change Compartment](#))

vcn-20210914-1409

Subnet in **e941720140** ([Change Compartment](#))

subnet-20210914-1409 (Regional)

! [Screenshot Dashboard Oracle] (img/4.jpg)

Configure placement

[Collapse](#)

The [fault domain](#) in which the MySQL DB System endpoint will be physically placed. It is recommended to allow Oracle to choose the best placement for the fault domain.

Availability Domain

AD-1

tOYo:AP-SYDNEY-1-AD-1

☐ Choose a Fault Domain

If you do not select a Fault Domain, Oracle will choose the best placement for you.

! [Screenshot Dashboard Oracle] (img/5.jpg)

Configure hardware

[Collapse](#)

Select a Shape

MySQL.VM.Standard.E3.1.8GB

CPU Core Count: 1

Memory Size: 8 GB

Change Shape

The shape determines CPU cores and memory allocated to each instance in a MySQL DB System. In multi-instance DB Systems the CPU core count and memory size will be multiplied by the total number of instances.

Data Storage Size (GB)

50

The amount of storage to allocate to the MySQL DB System for all data and log files.

! [Screenshot Dashboard Oracle] (img/6.jpg)

Configure Backup Plan

Enable Automatic Backups

Enables automatic backups. You must also specify a retention period, and select a backup window.

Backup retention period *Optional*

The Retention Period defines how long to store the backups, in days. ⓘ

Select Backup Window

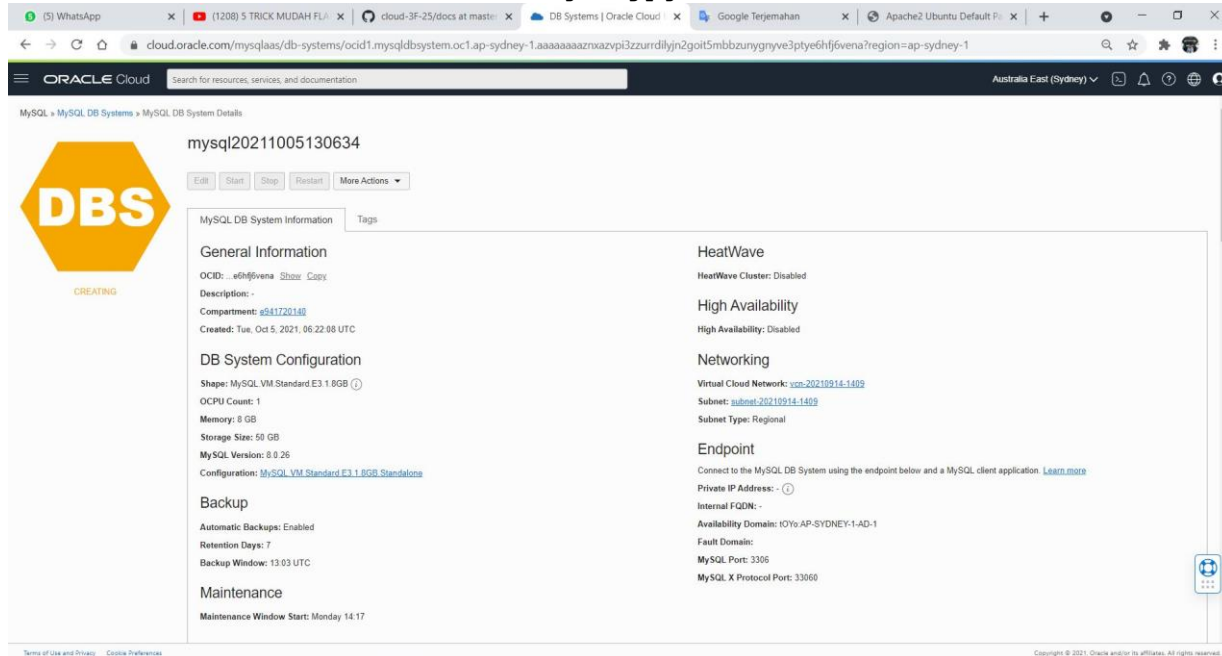

The backup window start time defines the start of the time period during which your DB System is backed up. [Show More](#)

 [Show Advanced Options](#)

Create

[Cancel](#)
